Vision

The center provides government and private organizations with information on logistics, researches and develops logistics and border trade in the north- eastern regions and neighboring countries.

Information Center: Provides updated data on regional logistics and border trade.

Research: Cooperatively research with more than 10 educational institutes and non-governmental organizations both in Thailand and in neighboring countries.

Research Synthesis and Research on Logistics and Supply chain, Trade and Facilitation, and ASEAN connectivity

Outreach: Seminars and fields are held to expand and contribute outreach on logistics and border trade to governmental and non-governmental sections.

Missions

1. To provide knowledge and innovations to and increase understanding of governmental and non-governmental sections and organizations in the north-eastern region concerning economy drive on logistics and border trade.

2. To link research network and synthesize research findings on logistics in the north-eastern region.

3. To develop business skills for entrepreneur in the north-eastern region.

4. To strengthen the competitiveness of entrepreneur in the north-eastern region.

5. To cooperative work with governmental and non-governmental sections namely the Provincial Commercial Office, The Federations of Thai Industries, The Board of Trade of Thailand, Thai Transportation and Logistics Association, and other international organizations to gather information needed for strengthening regional business competitiveness.

6. To build a business development network of the north-eastern provinces and the Asian counties.

People to People Connectivity
[Tourism, Education, Culture]
Physical connectivity
[Hard infrastructure]
Institutional connectivity

Because Loei and other north-eastern provinces locate in an area with border trade potentials, the Logistics and Border Trade Study Center was founded for the following purposes.

1. Boost economy drive of Thailand and the neighboring countries under the Asian Economy Community (AEC)
2. To act in accordance with the government policy on logistic and infrastructure development of Thailand and the regions.
3. To act in accordance with the vision of Loei Rajabhat University one of which is to provide outreach to society.
4. To provides governmental and non-governmental organizations with information on logistics to increase competitive abilities.
